Process Improvement • Data Analytics • Continuous Improvement Leader

PROFESSIONAL SUMMARY

Data Quality & Analytics professional with expertise in QA, reconciliation, and compliance in global financial services. Improved QA accuracy 15% YoY and automated processes saving 1,000+ analyst hours annually. Skilled in Alteryx, SQL, Tableau, Python, supporting APAC/EMEA operations.

SKILLS

Data Quality & Governance: Data Quality Controls, Reconciliation, Issue Identification & Remediation, Root Cause Analysis (RCA), KPI Design & Monitoring, Operational Risk Support, Audit Readiness

Analytics & Automation: SQL, Alteryx (Advanced Certified), Tableau, Excel, Python (Pandas, NumPy), ETL Design, Workflow Automation

Delivery & Leadership: Stakeholder Communication, Cross-functional Collaboration, Process Improvement (Lean), Agile Delivery, Executive-ready Reporting

WORK EXPERIENCE

JP Morgan & Chase Co.

Philippines, Taguig

Quality Analyst Team Lead

March 2025 - Present

- Perform BAU quality review of legal documentation for Ultra High Net Worth client accounts, ensuring completeness, accuracy, and compliance with internal standards.
- Improved QA review accuracy by 15% YoY through trend analysis, checklist refinement, and targeted feedback, supporting operational risk mitigation
- Reduced escalation turnaround time by 20% (5 → 4 days) by introducing KPI tracking and coordinating issue resolution across teams.
- Decreased rework volumes by ~10%, saving approximately 200 analyst hours annually through root cause analysis and preventive quality controls.
- Prepared and shared quality performance and reconciliation insights with managers and VP-level stakeholders to support operational and quality-related decision-making

Quant Analytics Analyst, Data & Analytics (Apprenticeship)

November 2024 - February 2025

- Automated recurring reconciliation and data quality reporting using Alteryx and SQL, reducing manual effort by an estimated 1,000+ analyst hours annually
- Designed and optimized ETL workflows to support accurate reconciliation across multiple data sources, improving data completeness and consistency by ~30%
- Built operational reconciliation dashboards using Alteryx and Tableau to support daily monitoring, issue identification, and follow-up by APAC teams

Earlier Experience

Account Specialist I - III, Supervisor Escalation

March 2022 – November 2024

- Developed escalation tracking and reporting templates, reducing repeat issues by 12%
- Presented KPI summaries and operational insights to management, supporting process improvement

Teleperformance

Philippines, Taguig

Technical Support Tier II, Subject Matter Expert

July 2020 – March 2022

- Reduced average case resolution time by 25% through process guide creation and automation initiatives.
- Trained and mentored 20+ support staff, improving team performance metrics by 15%

PROJECTS

- **AI-Assisted QA – Document Review Optimization:** Designed an AI-assisted pre-review solution to reduce manual document review time from ~1 hour to near-instant validation, improving reviewer efficiency and consistency.
- **Automated Reconciliation Initiative:** Automated reconciliation of ~2,000 records across systems using SQL and Alteryx, uncovering ~200 missing/uncreated records previously undetected.
- **Email Automation Initiative:** Automated daily templated email communications to remove manual dependency and ensure 100% on-time delivery.

EDUCATION

- **University of Makati** – Bachelor of Science in Computer Science (Social Computing Elective Track)
